Lesson: Tuesday 16:10-17:40 & Wednesday 14:30-16:00

Office Hours : N/A

Subject code : 1039

### Course Description:

The goal of this course is to understand how culture affects people's behavior and their values. The most effective way to understand this is through examining differences. Points of comparison can be made in areas such as language use, conversational style, verbal and nonverbal behavior, the concept of time and space, ethics, food and others. This course will be based on readings, short talks, videos, and class activities. Understanding comes not only through cognitive work, but also by being aware of emotional reactions. Thus, there will be a strong focus on experiential learning, but students will be expected to complete written assignments and document their experiences through written reflections.

### Resources

Handouts will be provided in each class.

### Evaluation

Homework and quizzes (50%)

Reflections (30%)

Presentations (20%)
