Course Description:

This is an introductory course to Japanese psychotherapies and healing methods. Learning and experiencing Japanese therapies, healing and religious/spiritual aspects within ourselves can help us with self-discovery and learning more about Japanese history, culture, spirituality and ways of thinking. This course consists of lectures, discussion, group research and presentation.

Field trips visiting various historical places and temples/shrines in the Kansai area will also be required. The course will be taught in English; however, important technical and cultural terms will be included in Japanese when necessary.

Resources

The teacher provides hand-outs for each class.

Evaluation

The grade will be given based on the participation to the class and discussion (25%), one group research project and presentation (25%) and two individual papers; book review and short essay (25% each).

For each day late on any of the assignments 5% will be deducted for other factors.
