- (C2) World Around-TRIZ Sites Basic Index (◎○)
- (C1P) World Around-TRIZ Sites Top Catalog (◎) for Print
- (C2P) World Around-TRIZ Sites Basic Catalog (◎○) for Print
- (C3) World Around-TRIZ Sites Extended Index (□) Under construction
- (C3P) World Around-TRIZ Sites Extended Catalog (□) for Print Under construction

Current Active Version: Posted: Jun. 30, 2020

Editor: Toru Nakagawa (OGU, Project Leader)

Posted: Jun. 30, 2020

Code name (C2) is introduced for this page. (Jun. 30, 2020)

Editor's Note (Toru Nakagawa, Jun. 30, 2020)

This is the (C2P) Basic Catalog (◎○) for Print of the (C) WTSP World Around-TRIZ Sites Catalogs as specified in a tabular form as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Name</th>
<th>Listed sites</th>
<th>Site description</th>
<th>Usage</th>
<th>File(s)</th>
<th>Purpose</th>
</tr>
</thead>
<tbody>
<tr>
<td>(C2P)</td>
<td>World Around-TRIZ Sites Basic Catalog (◎○) for Print</td>
<td>◎ ○ □</td>
<td>Included</td>
<td>Yes</td>
<td>Download, print, PC</td>
<td></td>
</tr>
</tbody>
</table>

See the parent page (C) for various explanations in using/reading this Index.

Table of Contents in (C2) and (C2P) (Posted: Jun. 30, 2020)

communities around the world.

Our Mission: Spread ideas; TED is a global community, welcoming people from every discipline and culture who seek a deeper understanding of the world. We believe passionately in the power of ideas to change attitudes, lives and, ultimately, the world. On TED.com, we're building a clearinghouse of free knowledge from the world's most inspired thinkers — and a community of curious souls to engage with ideas and each other, both online and at TED and TEDx events around the world, all year long. In fact, everything we do — from our Conferences to our TED Talks to the projects sparked by The Audacious Project, from the global TEDx and TED Translators communities to the TED-Ed lesson series — is driven by this goal: How can we best spread great ideas?

--- Written by Toru Nakagawa, Jul. 28, 2019

TN3D-04 ◎ Project Smart https://www.projectsmart.co.uk/ UK en
Roles: (a1) Dedicated for information sending, (a2) Public Web site, (g3) Knowledge sharing

Top page: Project Smart is the project management resource that helps managers at all levels improve their performance. We provide an important knowledge base for those involved in managing projects of all kinds. With weekly exclusive updates, we keep you in touch with the latest project management thinking.

About: Project Smart launched in 2000 as a way to offer easy access to information about the project management profession and has grown from there. The philosophy of the website is to provide free, high-quality, ethical content in an accessible form while encouraging an open discussion. TN2A-38 ◎ 12Manage https://www.12manage.com/ Location: Netherlands Language: en, and 11 languages
Roles: (a1) Dedicated for information sending, (g9) Knowledge sharing, (g5) Term dictionaries, (e7) Networking/matching organizations

Top page: Welcome to the world's #1 website about management: Advance yourself in business administration and management. All you need to know about your management subject on one page. Discuss issues with managers, consultants and academics in our business forums. Sign up for free.

About: Organizational Purpose: 12manage was founded in 2006 to make management know-how available all over the world. In particular for people who can not afford an MBA.
Profile: 12manage is an on-demand knowledge platform for managers, specialists and academics about management. The members of this network are mostly senior managers (60%), as well as management specialists (20%) and management academics (20%). Our knowledge centers are referenced by ± 1,000,000 members. See also: What people think of 12manage.
Knowledge Centers about Management: 12manage provides for each management method, model or concept: a concise description, its history, calculation, usage and application, process steps, strengths and benefits, limitations and disadvantages, assumptions and
conditions, references, as well as an interactive member forum. Premium members have additional access to best practices, expert tips, powerpoint presentations, micro-learning videos, resources, and recent news for each method. Our explanations focus on concepts that are both scientifically accepted and applicable in management practice.

12 Disciplines, 12 Languages: All management knowledge centers are classified into 12 management disciplines: Change & Organization, Communication & Skills, Decision-making & Valuation, Ethics & Responsibility, Finance & Investing, Human Resources, Knowledge & Intangibles, Leadership, Marketing, Program & Project Management, Strategy and Supply Chain & Quality. All management disciplines and knowledge centers are available in English, plus the following 12 languages: Arabic, Chinese, Dutch, French, German, Italian, Japanese, Korean, Portuguese, Russian, Spanish and Swedish.

Management Dictionary and More: 12manage also provides a Management Dictionary with 2000 entries, Management Issues, a Management Start Page, and useful Management Links. We distribute a weekly newsletter.

Special Interest Groups: 12manage members can participate in our SIGs, allowing to network and exchange information with peers all over the world. There is a SIG for each management knowledge center in each language.

Editor, Contributors: 12manage is edited independently (Editor). We try to make using 12manage as simple and user-friendly as possible. We'd like to thank those that made a contribution to 12manage, including the most important people, see our Wall of Fame.

| Description of Introduction *    | The Official G.S. Altshuller Foundation, together with the Rights Holders of the Altshuller copyrights, created this website so that anyone can find amongst all the above of the original texts of the creator of TRIZ-RTV-TRTL, Genrikh Saulovich Altshuller (15 October 1926 – 24 September 1998).
That is one of the goals behind the creation of the website and the G.S. Altshuller Foundation: to present the undistorted (reference) works of G.S. Altshuller to the users of the theory he created. | Free format, in 5-10 lines|
| Further Detailed Information     | Optional                                                                    |                              |
| Note of description              | Remarks for further revision                                                 |                              |

Roles: (a1) Dedicated for information sending, (g3) Knowledge sharing

Note (TN, Sept 27, 2019): This is a wonderful system of eBooks authored principally by Larry Ball. Introductions, e.g. purpose, usage, structure, recommendations of studying, etc. are explained first in 4 short videos. He met “TRIZ as an Exact Science” by G. Altshuller in 1989 and studied, used, and taught TRIZ and invention algorithms for many years, while keep brushing up his own understanding. He posted his teaching materials in the TRIZ Journal in 2002 and its revised edition “Hierarchical TRIZ Algorithms” in 2005. The present eBooks “TRIZ Power Tools” were posted in May 2018, after much revisions. The contents are mainly based on TRIZ but reflects other methods including Design Thinking, Disruptive Innovations and Marketing, Blue Ocean Strategy, Theory of Constraints, and One Simple Idea. He says the best way to learn deeply is to recreate knowledge after your own understanding, according to modern learning theory. All of the books and materials on this site are free. While all of the class materials are copyrighted, they can be downloaded and printed for personal and classroom use without fear of copyright violation. It is remarkable that the texts written in English can be translated automatically into (practically) any language with the Google translator without waiting.

The contents are composed of two big groups. (A) Inventive Jobs (e.g., Discovering markets, Creating offerings (products/services), Designing and prototyping, Reducing offering burdens, Resolving problems, Selling of licensing your offering) and (B) Inventive Skills (e.g., Resolving contradictions, Working with functions, Idealizing useful functions, Idealizing informing functions, Idealizing harmful functions, Discovering cause, Discovering why targeted objects are required, Mobilizing function resources, Neutralizing harmful functions). These jobs and skills are to be used in various ways of appropriate combinations, as guided by the eBook navigation.

--- Written by Toru Nakagawa, Sept. 21, 2019

Roles: (a1) Dedicated for information sending, (g3) Knowledge sharing

About: This site is based on the comprehensive Handbook and Executive Guide that provide substantive discussions and analysis of the opportunities awaiting anyone in the field who wants to put intellectual property to work. The printed version includes 153 chapters on a full range of IP topics and over 50 case studies, composed by over 200 authors from North, South, East, and West, whereas this online resource contains much more than the Handbook. Among others, users like you are expanding the content with comments, discussions and document uploads.

If you are new to this site, we invite you to use the site guides available for policymakers, senior administrators, technology transfer managers, or scientists. The site guide distills the key points of each IP topic covered by the Handbook into simple language and places it in the context of evolving best practices specific to your professional role within the overall picture of IP management.

The Handbook with the companion Executive Guide, and this web site, have been developed by many dedicated individuals with the intent of making a resource available to the global community for putting intellectual property to work. The entire effort was overseen by an international Editorial Board.

We hope these resources uniquely contribute to efforts in global health and food security and the use of the Handbook and Executive Guide are endorsed by many distinguished individuals from our Board of Patrons.
Topics: 1. Innovation and IP Management: A Contextual Overview
2. Specific Strategies and Mechanisms for Facilitating Access to Innovation
3. The Policy and Legal Environment for Innovation
4. The IP Toolbox
5. Institutional Policies and Strategies
6. Establishing and Operating Technology Transfer Offices
7. Contracts and Agreements to Support Partnerships
8. Inventors and Inventions
9. Evaluation and Valuation of Technologies
10. Patents and Patenting: Balancing Protection with the Public Domain
11. Technology and Product Licensing
12. Dealmaking and Marketing Technology to Product-Development Partners
13. The Public Sector and Entrepreneurship
14. Freedom to Operate and Risk Management
15. Monitoring, Enforcement, and Resolving Disputes
16. Bioprospecting, Traditional Knowledge, and Benefit Sharing
17. Putting Intellectual Property to Work: Experiences from Around the World

--- Written by Toru Nakagawa, Sept. 19, 2019

About: Purpose of the Library: The Library provides free, easy-to-access, online articles to develop yourself, other individuals, groups and organizations (whether the organization is for-profit or nonprofit). Since 1995, the Library has grown to be one of the world’s largest well-organized collections of these types of articles and resources. The Library has gotten up to 1,000,000 visitors (not hits) per month. Many of its topics consistently rank in the top ten results from Google searches.

Who provides the library?: Authenticity Consulting, LLC, provides the Library as a free community resource. The Library has its own logo and domain name, apart from Authenticity Consulting, LLC. Carter McNamara, of Authenticity Consulting, LLC, began putting resources on the Internet for others, back in the very early 1990s when he had the privilege of working with the “Gopher” tool at the University of Minnesota.

All the articles are well categorized into: How to: Improve Yourself, Work With Others, Work With Groups, Lead and Manage in Your Organization, Improve Your Organization, Consult to Solve Problems in Organizations

TN3E-07  ©️ IPI (IGE)  https://www.ige.ch/ Switzerland  en

Roles: (a1) Dedicated for information sending, (c2) National organizations, (c4) Professional organizations

About: The IPI is responsible for examining, granting and administering industrial property rights (patents, trade marks and designs). It works together with governmental agencies, trade associations and businesses to enforce Swiss indications of source within Switzerland and internationally. The IPI also supervises the collective rights management organisations for copyright and provides information on intellectual property rights to individuals and companies in a variety of ways. Thus the IPI is the federal government's central point of contact for all questions concerning patents, trade marks, geographical designations of origin, design protection and copyright. Its mandate is set out in the Statute of the IPI (in German). It is responsible for drafting legislation and advising the Federal Council and other federal authorities on matters concerning intellectual property. The IPI also represents the interests of Switzerland at international level. Its legal mandate is regulated in more detail on an ongoing basis by the political instances and in particular the head of the Federal Department of Intellectual Property.

Justice and Police. The IPI is its own legal entity and is independent from the federal government budget.

Our mission: We are the Swiss Confederation's centre of competence for patent, design and trademark protection, indications of source and copyright. We help innovators and creators to create value out of their ideas, thus promoting innovation, competitiveness, cultural diversity and social progress.

Note (TN): IPI in English, IGE in German

Top page: We translate ISO management standards into Plain English. These standards are used to manage quality, to promote safety, to enhance security, to encourage sustainability, to control risk, to protect information, and to ensure that business continues whenever disruptive incidents occur. They're also used to protect the environment, the health and safety of workers, and the integrity of supply chains. Taken together, these standards offer a wealth of knowledge and information that both public and private organizations can use to improve their practices, to enhance their overall performance, and to achieve sustained success.

About: About the Authors: W. Chan Kim and Renée Mauborgne are Professors of Strategy at INSEAD and authors of The New York Times Bestseller Blue Ocean Shift and the 3.6 million global bestseller Blue Ocean Strategy
W. Chan Kim and Renée Mauborgne are Professors of Strategy at INSEAD, one of the world's top business schools, and co-directors of the INSEAD Blue Ocean Strategy Institute in Fontainebleau, France. For ten straight years, Kim and Mauborgne have been ranked in the top five management gurus in the world by Thinkers50. They are the authors of the over 4 million copy international bestseller Blue Ocean Strategy which is recognized as one of the most iconic and impactful strategy books ever written, and a New York Times, #1 Wall Street

https://www.osaka-gu.ac.jp/php/nakagawa/TRIZ/eTRIZ/eWTSP/eWTSP-WorldCatalog/eWTSP-World%20Catalog/World/World-C2P-AroundTRIZBasic-Catalog.html[2020/07/02 17:53:24]
A Roadmap To Help Organizations Face New Challenges With Confidence: With a speed and enthusiasm we did not expect, individuals, governments, companies, and nonprofits around the globe started to look at their world through the lens of red and blue oceans. The terms 'red oceans', 'blue oceans', and 'blue ocean strategy' soon entered the business vernacular. And the discussion moved from "What is blue ocean strategy?", to "How do we actually apply its theory and tools to shift from red to blue oceans?". To meet this new challenge, we studied the organizations that had applied our theory and methodology to create and capture blue oceans. We analyzed their successes and failures and drew lessons to understand not only the common factors leading to a successful blue ocean shift but also the pitfalls and hurdles that got in the way. After more than a decade of new analysis, we published our second book, the New York Times and Wall Street Journal bestseller, Blue Ocean Shift. Blue Ocean Shift provides a roadmap any organization can apply to move from red to blue oceans in a way that their people own and drive the process to succeed.

TN3D-32 ○ DPM (The Digital Project Manager)  https://thedigitalprojectmanager.com/  Canada  en
Roles: (a1) Dedicated for information sending, (g3) Knowledge sharing, (e5) Training organizations, (e2) Software/tool developers

About: Founded in 2011, The Digital Project Manager has become one of the largest and most credible platforms for digital project management information and thought leadership. With feature articles, how-to guides, tools, reviews, jobs and funnies, The Digital Project Manager draws on the rapidly expanding, global audience of digital project managers.

Top page: Why Is Project Management Important?
1. Strategic Alignment: Project management is important because it ensures what is being delivered, is right, and will deliver real value against the business opportunity.
2. Leadership: because it brings leadership and direction to projects.
3. Clear Focus & Objectives: because it ensures there's a proper plan for executing on strategic goals.
4. Realistic Project Planning: because it ensures proper expectations are set around what can be delivered, by when, and for how much.
5. Quality Control: because it ensures the quality of whatever is being delivered, consistently hits the mark.
6. Risk Management: because it ensures risks are properly managed and mitigated against to avoid becoming issues.
7. Orderly Process: because it ensures the right people do the right things, at the right time – it ensures proper project process is followed throughout the project lifecycle.
8. Continuous Oversight: because it ensures a project's progress is tracked and reported properly.
9. Subject Matter Expertise: because someone needs to be able to understand if everyone's doing what they should.
10. Managing and Learning from Success and Failure: because it learns from the successes and failures of the past.

About: WBDG is a gateway to up-to-date information on integrated ‘whole building’ design techniques and technologies. The goal of ‘Whole Building’ Design is to create a successful high-performance building by applying an integrated design and team approach to the project during the planning and programming phases.

The WBDG is the only web-based portal providing government and industry practitioners with one-stop access to up-to-date information on a wide range of building-related guidance, criteria and technology from a ‘whole buildings’ perspective. Currently organized into three major categories—Design Guidance, Project Management and Operations & Maintenance—at the heart of the WBDG are Resource Pages, reductive summaries on particular topics.

Development of the WBDG is a collaborative effort among federal agencies, private sector companies, non-profit organizations and educational institutions. Its success depends on industry and government experts contributing their knowledge and experience to better serve the building community.

Location: ?  
Language: en

Roles: (a1) Dedicated for information sending, (e1) Method developers, (g3) Knowledge sharing  
Site search 96 pages

About: BK101 is a collection of some of the worlds greatest resources of knowledge and information. Even though the research is far from being finished, BK101 is still an extremely valuable resource for valuable knowledge and information. One of the goals of BK101 is to use the knowledge resource to create a complete Education Software that will be self teaching, self directing and self testing, that will include all the educational courses from preschool through high school. The entire school curriculum will run on a laptop computer that has an Artificial Intelligent Teaching Avatar that manages your personal learning schedule and keeps track of your education progress. Students will be able to accurately measure their intelligence so they can confirm how well they understand themselves and the world around them.

TN2A-04 ◎ TJ (The TRIZ Journal)  
https://triz-journal.com/  
Location: USA  
Language: en

Roles: (a2) Public Web sites, (a1) Dedicated information sending

The TRIZ Journal started as early as in 1996 as a Web site dedicated for introducing and proliferating TRIZ, by the co-editors of Ellen Domb and Jim Kowalick. It posted several to ten articles every month written by the editors and various authors over the world, thus served for spreading the understanding of classical and modernized TRIZ in the Western world.

The operation of TRIZ Journal was handed to Real Innovation Network in 2006 but stopped posting new aticles in 2010. BMGI re-launched it in 2015 but stopped new posting in 2016. Even during these difficult years, the archives of all the articles were kept accessible.

In January 2018, Darrell Mann, Systematic Innovation, re-launched the TRIZ Journal as the public Web site. A wide variety of articles are posted regularly and frequently, mostly by the Editor himself.

JP-01 ◎ TRIZ Home Page in Japan  
(Editor: Toru Nakagawa)  
http://www.osaka-gu.ac.jp/php/nakagawa/TRIZ/  
(in Japanese)  
http://www.osaka-gu.ac.jp/php/nakagawa/TRIZ/eTRIZ/  
(in English)  
Location: jp  
Language: en, jp
Roles: (a2) Public Web site, (a1) Dedicated information sending, (e1) Method developer, (d1) Universities

Editor: Toru Nakagawa (Professor (1998-2012)/Professor Emeritus (2012-) of Osaka Gakuin University). He established this site in Nov. 1998 (Nov. 1 in Japanese and Nov. 15 in English), and has been posting new TRIZ-related information actively with unfixed interval of 2 to 4 weeks constantly till present.

The site posts introductory articles, overviews, papers, conference reports, etc. on TRIZ with a wider scope. Pages in Japanese and pages in English are posted more or less in parallel. The articles/papers are written not only by the Editor (in Japanese and in English), but also by many Japanese authors (in Japanese and some in English translation) and by many overseas authors (in Japanese translation and some in English). It has four 'Entrance Pages' adapted for four types of readers (i.e., for Children and high school students, for Students and the general public, for Engineers and researchers novice to TRIZ, and for Practitioners and experts of TRIZ): they show categorized lists of (pretty many) recommended pages with annotation.

The Editor's research themes have evolved from (a) introduction and proliferation of (classical and modernized) TRIZ, to (b) introduction and extension of USIT (Unified Structured Inventive Thinking), (c) proposal of Generalized Methodology for Creative Problem Solving (CrePS), and (d) Research on the Principal Contradiction ('Liberty vs. Love') of Human Culture.

TN3D-06 ◎ CFI (Corporate Finance Institute) https://corporatefinanceinstitute.com USA en
Roles: (b1) Dedicated associations, (a1) Dedicated for information sending, (e1) Method developers, (e5) Training organizations, (e4) Consultants  このサイト内で検索

About: The modern financial analyst requires a well-rounded skill set that takes time to acquire. Some of the skills are developed in university, some are developed on the job, and some of the skills come from experience and developing a strong business intuition. At CFI, we combine all three skill sets -- theory, application, and intuition -- into a condensed, self-paced program that can be taken anytime, anywhere.

CFI's Financial Modeling and Valuation Analyst (FMVA)® was designed based on over 20 years of financial analyst training experience delivered by our instructors at large global banks and institutions such as BlackRock, Credit Suisse, HSBC, JP Morgan, Deutsche Bank, Merrill Lynch, Bank of America, Citi, and more.
CFI courses give you practical skills, templates, and tools to move up the finance ladder. We pick up where business school leaves off to teach you on-the-job aspects of corporate finance, investment banking, corporate development, FP&A, treasury, accounting, and more. CFI courses are taught by professional wall street trainers, who have been teaching classes for new hires at global investment banks for over twenty years.

TN3D-28 ○ AOM (Academy of Management) https://aom.org/ USA en
Roles: (b2) Dedicated (academic) societies, (f1) Journals

About AOM: The Academy of Management is the preeminent professional association for management and organization scholars. Our worldwide members are professors and Ph.D. students in business schools at universities, academics in related social science and other fields, and practitioners who value knowledge creation and application. Founded in 1936, our global community today is nearly 20,000 strong, spanning more than 120 countries.

OUR VISION: We inspire and enable a better world through our scholarship and teaching about management and organizations.

OUR MISSION: To build a vibrant and supportive community of scholars by markedly expanding opportunities to connect and explore ideas.

Journals & Publications: The Academy of Management (AOM) is committed to advancing our understanding about theory, empirical results, education, and practice in the field of management. AOM publishes six journals, each of which broadly contributes to this objective while emphasizing particular scholarly aspects.

Academy of Management Review (AMR) provides a forum to explicate theoretical insights and developments.
Academy of Management Journal (AMJ) publishes empirical articles that advance theory-based knowledge.
Academy of Management Discoveries (AMD) publishes exploratory empirical research of management and organizational phenomena that theories do not adequately explain.
Academy of Management Annals (Annals) features critical and provocative reviews of the evidence emerging from management research.
Academy of Management Learning and Education (AMLE) provides a forum to examine learning processes and management education.
Academy of Management Perspectives (AMP) publishes accessible articles about important issues concerning management and business.

In addition to our journals, AOM publishes a newsletter, and our annual meeting Best Papers Proceedings, both of which are available in electronic format.

TN3E-20 ○ NCBI (National Center for Biotechnology Information)  
USA en  
このサイト内で検索

About: Our Mission: General Introduction: Understanding nature's mute but elegant language of living cells is the quest of modern molecular biology. From an alphabet of only four letters representing the chemical subunits of DNA emerges a syntax of life processes whose most complex expression is man. The unraveling and use of this "alphabet" to form new "words and phrases" is a central focus of the field of molecular biology. The staggering volume of molecular data and its cryptic and subtle patterns have led to an absolute requirement for computerized databases and analysis tools. The challenge is in finding new approaches to deal with the volume and complexity of data and in providing researchers with better access to analysis and computing tools to advance understanding of our genetic legacy and its role in health and disease. Creating NCBI: The late Senator Claude Pepper recognized the importance of computerized information processing methods for the conduct of biomedical research and sponsored legislation that established the National Center for Biotechnology Information (NCBI) on November 4, 1988, as a division of the National Library of Medicine (NLM) at the National Institutes of Health (NIH). NLM was chosen for its experience in creating and maintaining biomedical databases, and because as part of NIH, it could establish an intramural research program in computational molecular biology. The collective research components of NIH make up the largest biomedical research facility in the world.

Roles: (c2) National organizations, (h3) Educational organizations

About: The Australian Curriculum sets the expectations for what all young Australians should be taught, regardless of where they live in Australia or their background. ACARA draws on the best national talent and expertise, and consults widely to develop the Australian Curriculum and resources.
In the Australian Curriculum, students develop capability in critical and creative thinking as they learn to generate and evaluate knowledge, clarify concepts and ideas, seek possibilities, consider alternatives and solve problems. Critical and creative thinking involves students thinking broadly and deeply using skills, behaviours and dispositions such as reason, logic, resourcefulness, imagination and innovation in all learning areas at school and in their lives beyond school.

Top page: BCcampus Open Education contributes to the development of an open future for teaching practices and educational resources. BC Open Textbooks: Open Textbooks Adapted and Created by BC Faculty

What is Open Education?
What are Open Educational Resources?: In the BCcampus Open Education Self-Publishing Guide, we've shared our definition of open educational resources (OER): "teaching, learning, and research resources that, through permissions granted by their creator, allow others to use, distribute, keep, or make changes to them."
What are open textbooks?: A subset of OER, open textbooks, including those found in the B.C. Open Textbook Collection, can help improve the learning experience for students while mitigating the financial barriers keeping them from achieving their academic goals.
What are open educational resources?: Modifying materials to better suit student needs, and engaging in learning design that addresses individuals is essential for creating impactful learning experiences for students.
What are Creative Commons and open licensing?: Copyright, attribution, and shareability – how are they related, and why is this important for open education?
What are Canada's open education initiatives?: Each province and territory in Canada is responsible for managing its own education requirements – there isn’t a federal body to connect the educational initiatives across the nation, but the members of Canada OER have stepped up to help create a cohesive effort, specifically for open education, across the country.

TN3D-34 ○ CMBOK (Case Management Body of Knowledge) (by CCMC (Commission for Case Manager Certification))  https://www.cmbodyofknowledge.com/  USA  en
Roles: (c4) Professional organizations, (a1) Dedicated for information sending, (g3) Knowledge sharing,  このサイト内で検索

About: The knowledge, skills, abilities, and competencies of case managers are major factors in assuring the provision of safe and superior quality healthcare services to clients and their support systems, including their families, significant others, friends, caregivers, and others. The more current case managers are, the more they are able to demonstrate effectiveness in their case management practice and achieve desired outcomes.
To realize its mission to advance the practice of case management, the Commission for Case Manager Certification (the Commission) developed a case management knowledge framework for case managers and other healthcare professionals directly or indirectly involved in case management practice and across the continuum of health and human services and care settings. This case management knowledge framework is called the CMBOK. Unlike any other resource in the industry, the CMBOK is the only comprehensive body of knowledge that
is peer-reviewed and available online for case managers and other healthcare professionals.

TN3E-12 ○ European IP Helpdesk  https://www.iprhelpdesk.eu/  EU  en
Roles: (c4) Professional organizations, (e4) Consultants, (g3) Knowledge sharing, (e5) Training organizations  このサイト内で検索

About: European IP Helpdesk · CONSORTIUM: The European IP Helpdesk is a service funded by the European Commission (under contract EASME/H2020/2018/008) and managed by the Executive Agency for Small and Medium-sized Enterprises (EASME). It provides free-of-charge, first-line advice and information on Intellectual Property (IP). The services of the European IP Helpdesk are delivered and managed by a consortium established by the four partners Eurice GmbH, Universidad de Alicante, TUM-Tech GmbH and Universidad de Navarra.

Services: Whether you need personal support on a specific IP issue, want to be informed about the latest developments in the world of IP and Innovation in Europe, or are interested in a training session on IP – the European IP Helpdesk is the right partner to turn to.

Helpline: Register on the European IP Helpdesk website, or get in touch via phone or fax to receive support on your specific IP issue from a team of experienced legal specialists within no more than three working days.

Newsletter & Bulletin: Subscribe to the European IP Helpdesk email newsletter and Bulletin to keep track on latest developments in the field of IP: Online Library: Download fact sheets, case studies, guides and informative materials from an extensive online library.

‘Training & Events: Sign up to free webinars, or meet the team at training events and conferences.

Library: We have developed a broad range of different publications such as guides, case studies and fact sheets which provide hands-on information and practical guidance on how to tackle IP issues in business or at the different stages of an EU-funded collaborative research project. Additionally we offer templates of different agreements and model contracts.

TN3C-32 ○ EIT (European Institute of Innovation & Technology)  https://eit.europa.eu/  Location: EU  Language: en
Roles: (c4) Professional organizations

About the EIT: The European Institute of Innovation & Technology (EIT) is an independent body of the European Union set up in 2008 to deliver innovation across Europe. The EIT brings together leading business, education and research organisations to form dynamic cross-border partnerships. These are called Innovation Communities and each is dedicated to finding solutions to a specific global challenge.

EIT Innovation Communities develop innovative products and services, start new companies, and train a new generation of entrepreneurs. Together, we power innovators and entrepreneurs across Europe to turn their best ideas into products, services, jobs and growth.

(d) Academia

TN3A2-01 ◎ Stanford d.school  https://dschool.stanford.edu/  Location: USA  Language: en
Roles: (d1) Universities, (e1) Method developer

About: What we do: Our Point of View: We believe everyone has the capacity to be creative.

Putting design to work: We build on methods from across the field of design to create learning experiences that help people unlock their creative potential and apply it to the world. Design can be applied to all kinds of problems. But, just like humans, problems are often messy and complex—and need to be tackled with some serious creative thinking. That’s where our approach comes in. Adding the d.school’s tools and methods to a person’s skill set often results in a striking transformation. Newfound creative confidence changes how people think about themselves and their ability to have impact in the world.

TN3C-36 ○□ Study Portals  https://www.studyportals.com/  Location: Netherlands  Language: en
Roles: (d1) Universities
About: Studyportals is the global study choice platform. Empowering the world to choose education. Studyportals began as a spin-off from a couple of large international study associations. It was born out of frustration, a total lack of information and overview of the fast-growing number of international Master's programmes in Europe. In 2007, Mastersportal was born and proved to be a roaring success. Soon after, Bachelors, PhD, Short Courses, Distance Learning and Preparation courses portals followed suit. In 2018, we helped over 36 million students around the world to explore study programmes and make an informed choice, throughout over 190,000 courses at 3,200+ educational institutes across 110 countries.

TN2A:48  ◎  AULIVE (Simon Dewulf)  https://www.aulive.com/  Australia  en
Roles: (e1) Method developers, (a1) Dedicated for information sending, (g3) Knowledge sharing, (f2) Software/tool developers, (e5) Training organization

Note (TN, Sept. 27, 2019): Simon Dewulf, former owner of CREAX in Belgium, moved to Australia and started AULIVE Pty Ltd in 2012. The AULIVE site has 4 branch sites.

(A) Innovation Logic (https://www.innovationlogic.com.au/): Top page: AULIVE brings Innovation Logic, a collection of hands-on tools and a systematic method designed to demystify and systematize the space of creativity, innovation and value creation. With 20 years research and development in the domain of innovation, we have distilled the AULIVE method as 8 easy steps to innovate products or processes, with the inspiration tools. ... The steps are: Aim: value and function, Use: resources in time and space, Link: your product or process DNA, Import: inspiration from outside, Vary: change for better function, Elect: ideas to concepts.

(B) Patent Inspiration (http://www.patentinspiration.com/): This site provides with a useful tool for patent searches. In the free space, the operation of the software is fully demonstrated with a case in two videos. Surveying patents is possible at the text level freely but needs registration for visualizing them in various graphs.

(C) More Inspiration (http://www.moreinspiration.com/): This site is a large collection (currently 4961) of example of Innovations, each shown with a photo/video and explanation. They have tags of industries and products. It is remarkable that the essence of innovation of each case is explained with the installed property and the resultant function. Such properties and functions are well categorized and symbolized (in addition to the text), thus many cases of the same property (or of the same function) are readily shown by clicking the symbol of property (or function). This site is very useful for obtaining inspiration from various cases.

(D) Production Inspiration (http://www.productioninspiration.com/): You can select a function you want to perform and select a state you want to operate on, then a number of ways (i.e., production methods) to achieve the function are shown with illustrations. E.g., 'Corrodes' 'Solid' gives you 19 production ways.
--- Written by Toru Nakagawa, Sept. 27, 2019
About: Ideation International is a private, U.S.-based company founded in 1992 and headquartered in Michigan. The company focuses on the Theory of Inventive Problem Solving (TRIZ). Ideation provides a structured methodology for resolving complex problems, marketed via educational programs, analytical services and a line of software, TRIZSoft, which together provide the necessary resources to control the innovation process. Ideation is fortified by a staff composed of the world's leading TRIZ scientists, who have advanced this scientific theory with powerful new applications and software tools to meet the needs of today's competitive marketplace.

(Four pillars of methods/software tools): IPS (Inventive Problem Solving): IPS helps solve complex technological problems by supporting both the analytical and solution-synthesis stages of problem solving. APD (Anticipatory Failure Determination): APD is a cost-effective method of analyzing and predicting failures in products and processes. It guides users in documenting the situation, formulating the related problem(s), developing hypotheses, verifying potential failure scenarios, and finding solutions to prevent or eliminate the problem(s).

DE (Directed Evolution): DE drives innovation and growth proactively instead of relying on reactive responses to traditional and uncertain technological forecasting. DE is a process for analyzing and evaluating a system from both technological and market standpoints, developing a comprehensive set of possible scenarios for future evolution, establishing a decisive course of action, securing intellectual capital and defining a plan to create next-generation products, processes, and technologies.

IP (Intellectual Property): IP validates and increases the value of your Intellectual Property. Our analysis will reveal opportunities for enhancing your IP's value and protecting it from infringement and circumvention.

--- Written by Toru Nakagawa, Sept. 27, 2019

Value statement: The Science to Power Innovation: It is our mission to deliver clients breakthrough innovation solutions that impact the bottom line. Leveraging GEN TRIZ's powerful combination of skills and experience, we are committed to delivering clients the following benefits: Increased Speed to Market; Lower Innovation Risk; Greater Return on Investment.

Methodology: At the heart of GEN TRIZ's innovation expertise lies a deliberate and rigorous methodology. For over 20 years, our innovation experts have continued to enhance and adapt the methodology to respond to the changing needs of the market. GEN TRIZ's methodology is a framework comprised of a collection of analytical and problem-solving tools. Key Principles: Understand main parameters of value; Consider technology evolution; Focus on functions; Address key problems; Adapt existing solutions, don't always invent.

GKN: If a problem requires external knowledge, we leverage our privately managed network to gain a deeper level of subject-matter expertise and insight. Guided by Function-Oriented Search, GEN TRIZ project teams leverage this network for consultation, theoretical advice, and/or support with physical experiments. And while our network provides invaluable contributions, the project teams themselves remain ultimately responsible for developing the solutions that meet the project's goals.

--- Written by Toru Nakagawa, Sept. 27, 2019

About: GEN TRIZ is a Technical Innovation Solutions Provider that delivers world-class product, process and packaging innovation services. For twenty years, our innovation specialists have been serving many of the largest and best-known consumer packaged goods, industrial products, and medical products companies in the world. We believe that to consistently deliver high impact results, breakthrough innovation can and must be practiced as a scientific discipline in itself. Our team is comprised primarily of scientists and engineers (over half hold PhDs) with expertise and experience in the innovation process. Our teams deliver breakthrough results by combining the power of GEN TRIZ's proprietary, systematic innovation methodology with the leverage gained from our private Global Knowledge Network (GKN) of over 8,000 scientific, engineering and subject matter experts.

GEN TRIZ delivers a range of sustaining and breakthrough innovation services through dedicated project teams. In addition we offer training programs and facility to build internal innovation capabilities, as well as selectively develop and manage new technology ventures. GEN TRIZ has a technical innovation center and maintains laboratories to test and validate new product and process concepts.

About: A History of CEF: Founded in 1954, the Creative Education Foundation is the recognized world leader in Applied Imagination. Alex Osborn, an adman and educator, not only founded CEF, but also invented brainstorming and co-founded the ad firm, BBDO. His classic book, Applied Imagination, continues to inspire the work of CEF. Along with Sidney Parnes, Osborn developed the Osborn-Parnes Creative Problem Solving process. For more than 50 years, CEF has been teaching adults and children in organizations, schools and communities how to use this proven process to develop new ideas, solve problems and implement solutions.

Top page: The Creative Education Foundation (CEF) is a nonprofit that sparks personal and professional transformation by empowering people with the skill set, tool set, and mind set of deliberate creativity. Our goal is to teach all people to use Creative Problem Solving to develop new ideas, solve problems, and implement solutions. Join us to unlock the creative genius in everyone!

What is Creative Problem Solving (CPS)?: CPS is a method for approaching a problem or a challenge in an imaginative and innovative way. It’s a process that helps you redefine the problems and opportunities you face, come up with new, innovative responses and solutions, and then take action. The tools and techniques used make the process fun, engaging, and collaborative. CPS not only helps you create better solutions, it creates a positive experience that helps speed the adoption of new ideas.

Roles: (e2) Software/tool developers, (e1) Method developers, (e8) Solution developers
About: Deacom was founded by Jay Deakins in 1995 in the basement of his split-level home outside of Philadelphia. After owning a process manufacturing company, Jay saw an opportunity in the market for an ERP that could solve the unique challenges process manufacturers face. Jay built the DEACOM ERP platform from the ground up while balancing programming, support, implementation, and sales with family time.
25 years, 140 employees, and 225 customers later, Deacom remains a thriving business dedicated to the success of process manufacturers around the globe. Jay continues to be the Founder and CEO, working with the Deacom team members to push the company to new heights.

TN3E-16 ○ Acclaim IP  https://www.acclaimip.com/
Roles: (e2) Software/tool developer, (e8) Solution providers, (g3) Knowledge sharing
About: The AcclaimIP story: FreePatentsOnline founders James Ryley and Erik Reeves along with a new partner Matt Troyer conceived AcclaimIP in the summer of 2010. Our goal from the beginning was to make patent research software easier to use, higher performance and more complete, with innovative features that help our clients do a better job in less time. The FreePatentsOnline legacy is what keeps us focused on performance. Amazing features that take 30 minutes to run don’t get used, so we built on our legacy of performance and created AcclaimIP.com. AcclaimIP is now our flagship product that brings high-end patent search and analysis to our customers at an affordable price.
James has a PhD in molecular biology, is a registered patent agent and a creative at heart. Erik runs the daily operations of the company including managing the development team and keeps everybody focused on our broad vision. Matt leads the AcclaimIP sales and marketing
effort by interacting with the customers, leading the sales team, and specifying new features from customer requests. We launched the AcclaimIP in January 2012 with excellent reception. Since then we have consistently improved the software, doing a new build about every two weeks, improving everything from the user interface, performance, new features and new data collections. In March of 2016, AcclaimIP was acquired by Anaqua, Inc. The entire team moved over to Anaqua. We’ve hired more developers to accelerate our development, more customer service people to better service our customers. We also acquired 40 full text English translated patent collections, giving us the most complete set of patent data and original PDFs. We also acquired Patent River who are experts in PublicPAIR data, and we look forward to integrating the new data into AcclaimIP.

AcclaimIP Patent Search & Analytics: Searching through over 100 million patents can be a daunting and time-consuming task. AcclaimIP is one of the fastest, most intuitive, and comprehensive tools for conducting patent searches, analyzing patents, and determining patentability.

About: Who is Appian? Appian provides a low-code development platform that accelerates the creation of high-impact business applications. Many of the world’s largest organizations use Appian applications to improve customer experience, achieve operational excellence, and simplify global risk management and compliance.

About Appian: Before Appian was a company, it was an idea. Not about a product or a market, but about the culture needed to sustain innovation and value. Appian was founded on the belief that talented and passionate people, given the power to be heard and the autonomy to excel, will deliver amazing results. Today, Appian is a recognized global leader in multiple enterprise technology markets. Markets called intelligent business process management systems (iBPMS), dynamic case management (DCM), digital process automation (DPA), and low-code development. Regardless of what you call it, our mission is the same. We’re here to simplify what it takes to turn great ideas into powerful business applications that deliver significant value.

Top page: TargetProcess: project management software that you can use without a thick operations manual.

About: Company: We don’t just make Agile software—it’s how we built our company. Since November 2004, Targetprocess has enabled businesses to sustain a start-up culture while scaling their Agile teams. We built our company on steady, organic growth, generated almost entirely from customer referrals. We figured that if we needed or wanted to grow quickly, we’d invest in our technology. We didn’t want to interrupt the process of building our entirely original, award-winning visual management tool. Betting on our product worked. Targetprocess started as a five-person company (honestly, a group of guys who wanted to tinker with the idea of Agile on their free nights and weekends). We’ve since grown to a team of over 120 international employees. You can find Targetprocess employees everywhere, from Belarus to Berlin to Buffalo. Our ability to scale with a distributed team draws on the culture derived from Agile principles. We make Agile project management software that you can use without a thick operations manual.

About: About ITIL (IT Infrastructure Library): ITIL® describes best practices for the effective and efficient provision of IT services. ITIL® (the "IT Infrastructure Library") was first developed at the end of the 1980's by the Central Computing and Telecommunications Agency (CCTA), a government agency in Great Britain. The reason for commissioning the CCTA was a lack of quality in the IT services procured by the British Government, and a method had to be found to achieve better quality at lower cost. So the CCTA set out to develop recommendations for the effective and efficient provision of IT services. This resulted in a catalogue of best practices for IT organizations, which today is known as "ITIL", the most widely accepted approach to IT service management.

ITIL has grown into a huge framework, so at some point back in 2007 we concluded that an ITIL Wiki is the best way of making this content widely accessible. The ITIL Wiki [1] includes detailed descriptions of the ITIL processes and sub-processes, complete with their inputs and outputs, ITIL roles and metrics (ITIL KPIs), plus a set of free ITIL templates and checklists from our ITIL® Process Map.

A fresh approach to ITIL®: The ITIL Process Map is a ‘translation’ of ITIL® into legible, easy to read process maps in Microsoft Visio®, ARIS™ and other process management platforms. It explains how ITIL really works and does away with the need to sift through the books with thousands of pages.

About: PatentSight was founded in 2008 by Nils Omland as a spin-off from the WHU – Otto-Beisheim School of Management. Before founding PatentSight, Nils worked together with Prof. Dr. Holger Ernst for several years in the field of patent valuation and analytics. The pioneering thought leadership of Nils and Holger is expressed in ground-breaking, rewarded and highly-cited scientific publications. Shortly after the foundation, Holger became the first Senior Advisor at PatentSight and one of the shareholders for many years.

PatentSight launched its first Business Intelligence Software in 2012. Our software solution provides unique, reliable and relevant insights into the patent landscape for decision makers and patent experts in the fields of benchmarking, R&D strategy, trendscouting, M&A, licensing and portfolio optimization. 7 of the top chemical firms use PatentSight's analytics platform. Other blue chip clients come from various industries such as health care, automotive, consumer products, telecommunication, logistics, software, engineering, electronics from around the world.

An important milestone in 2009 was the development of the Patent Asset Index™, a new approach to assess patent quality and to benchmark patent portfolios. Patent Asset Index™ was first endorsed by BASF and Dow Chemical. Since then, the Patent Asset Index™ has been adopted by many more firms from various industries. PatentSight continues to conduct cutting-edge research to advance our understanding about best practices, methods and tools in the field of intellectual property valuation, management and analytics.

TN3D-53 ◯ JMP Statistical Discovery from SAS  https://www.jmp.com/  USA
Roles: (e4) Software/tool developer, (e6) Training organizations

About: The JMP and SAS Connection: JMP has been a part of SAS since the first version of JMP statistical discovery software was launched in 1989, bringing interactive data visualization and analysis to the desktop. SAS is the leader in business analytics software and services, and the largest independent vendor in the business intelligence market. Through innovative solutions, SAS helps customers at more than 60,000 sites improve performance and deliver value by making better decisions faster. Since 1976 SAS has been giving customers around the world THE POWER TO KNOW®.

About JMP: JMP is a business unit of SAS that produces interactive software for desktop statistical discovery. Pronounced "jump," its name suggests a leap in interactivity, a move in a new direction. John Sall, SAS co-founder and Executive Vice President, created this dynamic software and remains its chief architect and leader of the JMP division. Introduced in 1989 with scientists and engineers in mind, JMP has grown into a family of statistical discovery products used worldwide in almost every industry. From its beginnings, JMP software has empowered its users by enabling interactive analytics on the desktop. JMP products continue to complement—and are often deployed with—SAS solutions that provide server-based business intelligence. The SAS commitment to accuracy, value and quality is evident in every JMP software release. Training, technical support, licensing and distribution are provided to JMP users the world over through SAS. Teams specializing in JMP products are located in the United States, Europe, China and Japan.

About: Founded and centered in the Netherlands in 2003 by TRIZ Master Valeri Souchkov, ICG T&C is a company operating with an international network united by the common goals and mission to develop and bring to the market the best methods, tools, and solutions which boost, leverage, and manage creativity and innovation. Among our customers are both large and small organizations which are willing to not just observe but to create future. Prior to founding ICG T&C, Valeri Souchkov co-founded Invention Machine Labs in 1989 which pioneered promotion of TRIZ and Systematic Innovation in Western Europe, USA, and Asia. In 2000 Valeri Souchkov initiated and co-founded the European TRIZ Association (ETRIA).

Top page: Our mission is to empower the world with TRIZ-based Systematic Innovation which brings a process of producing breakthrough innovative solutions to a radically new level and helps our customers to transform a fuzzy innovation front-end to a predictable, manageable and highly productive process.

Why TRIZ and Systematic Innovation?: … Methods and tools of TRIZ and Systematic Innovation organize and support a process from dealing with ill-defined initial situations towards producing and selecting new ideas with the highest value/costs ratio thus making dealing with an innovation "fuzzy front-end" manageable and predictable. … Recently enriched with a number of new tools, such as Root Conflict Analysis, Function Analysis, Technology-Market Evolution Matrix, Value-Conflict Mapping, and Innovation Roadmap TRIZ makes it possible to establish a well-structured process of achieving continuous innovation and developing breakthrough ideas for new products, technologies and services in a systematic way. … Today, innovation becomes a well-planned activity which integrates a wide range of methods, tools, as well as organizational culture, management support, and other crucial ingredients. Such a system becomes available to everyone involved to innovation processes thus immensely increasing the innovative productivity of organizations and individuals.

Note (TN, Sept. 27, 2010): This site has a well-organized top page, not only showing their own training and consulting activities but also introductions, papers, and overviews of TRIZ and Systematic innovation in a wider scope.

TN3C-10 ◯ Gartner  https://www.gartner.com/  Location: USA  Language: en
Roles: (e4) Consultants

About: Founded in 1979, we are the leading research and advisory company. We’ve expanded well beyond our flagship technology research to provide senior leaders across the enterprise with the indispensable business insights, advice and tools they need to achieve their mission-critical priorities and build the organizations of tomorrow. Together with our clients, we fuel the future of business so that a more successful world takes shape.

--- Written by Toru Nakagawa, Sept. 21, 2019

About: We help organizations across the private, public, and social sectors create the change that matters. We have always helped our clients identify and set the direction toward their most important goals. Today, we go further: working together to turn these ambitious goals into reality. From the C-suite to the front line, we partner with our clients to transform their organizations in the ways that matter most to them. This means embedding digital, analytics, and design into core processes and mind-sets: building capabilities that help organizations and people to thrive in an ever-changing context; and developing excellence in execution to ensure that actions translate into outcomes, quickly and sustainably. With exceptional people in 65 countries, we combine global expertise and local insight to help you create the change that truly matters.

Our consultants include medical doctors, engineers, designers, data scientists, business managers, civil servants, entrepreneurs, and research scientists. They join McKinsey for the opportunity to apply their talents to complex, important challenges. We take a consistent approach to recruiting and skills development regardless of where our people are located, so that we can quickly deliver the right team, with the right experience and expertise, to every client, anywhere in the world.

Our work is founded on a rigorous understanding of every client's institutional context, sector dynamics, and macroeconomic environment. For this reason, we invest more than $600 million of our firm's resources annually in knowledge development, learning and capability building. We study markets, trends, and emerging best practices, in every industry and region, locally and globally. Our investment in knowledge also helps advance the practice of management. We publish our findings extensively, and we engage with leading thinkers on the most pressing issues facing our clients and society.

Note (TN, Sept. 26, 2019): In the section of Solutions, a number of case studies and perspectives are shown openly. And many more with short summary and the invitation "Contact us".

Our consultants have strong practical industry experience combined with excellent knowledge of key trends and dynamics. Arthur D. Little is present in the most important business centers around the world. We are proud to serve most of the Fortune 1000 companies, as well as other leading firms and public sector organizations.

--- Written by Toru Nakagawa, Sept. 21, 2019

IDEA is a consulting firm specialized in TRIZ, starting in 2003 by spinning off from ITEQ, and has been actively conducting trainings and consulting in industries and open seminars. IDEA has particular strength in applying QFD-TRIZ-TM in an integrated manner to new product development, and in consulting with big and SME companies in such a strategy.

The Web site explains to use the following four IDEA-style scientific development methods in an integrated way: Seeds-driven Quality Deployment (SDCD, for developing new business fields), IDEA-QFD (for developing new products in existing business fields), IDEA-TRIZ (for innovative problem solving with break-through solutions), and IDEA-TM (for implementing new solutions optimally). Various documents of these TRIZ-related methods are downloadable free of charge (with registration). IDEA also sells TechOptimizer and Goldfire Innovator of Invention Machine (later under IHS) as a dealer and promotes the use of software tools together with their methods.

At Japan TRIZ Symposia, several industrial customer companies reported their successful results of promoting/applying IDEA ways in their new product development, confirming the effectiveness of IDEA’s methods and consulting.

The following two blog sites were operated several years ago, but have not been updated recently:
Blog by Mamoru Zenko, President: ‘I’m fine, today, too’ (Diary by IDEA President): http://blog.livedoor.jp/n2ublog-00018/

https://www.osaka-gu.ac.jp/php/nakagawa/TRIZ/eTRIZ/eWTSP/eWTSP-WorldCatalog/eWTSP-World%20Catalog/World/World-C2P-AroundTRIZBasic-Catalog.html[2020/07/02 17:53:24]
Since 2001 Kazuya Yamaguchi led the innovation of development process and quality management in Kyushu Matsushita Electric Co. (renamed into Panasonic Communications Co. (PCC) in 2003) by using scientific methods including quality engineering, TRIZ, and QFD. He retired from PCC in 2007 and started a consulting firm, MOST LLC, together with his several colleagues who worked together for the PCC process innovation.

MOST's philosophy is “To propose and provide methods for drastic innovation applicable in the era of AI (Artificial Intelligence, e.g., IoT and Factory big data)”. More specifically it proposes “to use scientific technology tools in the world (e.g., QFD, TRIZ, Quality engineering (or TM), MATLAB, and some other universal-use tools) effectively, to improve the current styles of research, development, design, and manufacturing into new business promotion styles with high efficiency, and to put your business on a sustainable and growing curve by obtaining maximal results in achievements.”

Their methods are written closely by the MOST members in their books (or white papers), which are available in their HP with free downloading (without registration). They include:

1. “Improve your quality, then your costs get reduced (recommendations to Taguchi Method)” by Kazuya Yamaguchi (95 pages).
2. “How to eliminate the needs of remaking software in the market due to bugs (recommendations to Taguchi Method)” by Kazuya Yamaguchi (27 pages).
3. “We can design without remaking! (Parameter design in Taguchi Method)” by Ikuro Hamada (59 pages).
4. “Method to realize No. 1/only-one products easily (TRIZ)” by Kiyoaki Matsui (28 pages).
5. “Method to develop epoch-making products easily (QFD-TRIZ-TM and Technology and IP strategies)” by Kazuya Yamaguchi (42 pages).
6. “Method to achieve visual inspection drastically efficiently (MATLAB and TM)” by Ken-ichi Kawano (30 pages).
7. “Method to achieve acoustic inspection drastically efficiently (MATLAB and TM)” by Ken-ichi Kawano (30 pages).
8. “Business strategy for executives to raise their performance surely (Raising performance/results come from raising members)” by Kazuya Yamaguchi (51 pages).

All these textbooks are impressive with their strong encouraging messages.

About Infinity QS:

Our mission is to help organizations of all sizes achieve excellence in quality by providing software, services, and expertise that exceed expectations. Every InfinityQS® employee's interaction with our clients must reinforce this commitment to their organization, objectives, and goals.

Quality Policy: Quality is the foundation of our business. It extends beyond the products and services we deliver and into the core of how we operate as an organization.

History: InfinityQS was founded in 1989 by Michael A. Lyle and Christopher Kearsley. Veterans in the quality control industry, the founders saw unique marketing opportunities for manufacturers needing computerized controllers to automate various types of industrial equipment. Within the semiconductor industry, they found companies in further need of advanced analytical tools to help them better statistically monitor and control their manufacturing processes.

**TN3A2-86  ○ Design Thinking Academy  [https://www.designthinkersacademy.com/]  Netherlands en**

Roles: (e5) Training organizations, (h3) Educational organizations

About: DesignThinkers Academy was initiated by the Founders of DesignThinkers Group. DesignThinkers Group is one of the leading design driven innovation agencies helping organizations around the world making the transition from being strictly product orientated and sales driven, towards being service orientated and human centered. We are represented in 25 countries and train, develop and facilitate multidisciplinary teams and communities of change.

Mission: DesignThinkers Academy aims to inspire people and teams by organizing thought-provoking events and lectures, training and personal coaching programs to help organizations build the necessary capabilities, culture and mind-set using Design Thinking tools and methods. Our aim with the DesignThinkers Academy Network is to create an open network to facilitate and inspire a rich conversation between creative thinkers and doers. We strive for a learning community that has a positive impact on people’s lives, careers and our ever-changing world.
What is Design Thinking?: Design Thinking inspires and challenges a team to learn by doing and strengthens their ability for creative problem solving. It helps organisations build the necessary environment and mentality to make change happen. Design Thinking is human-centered, it places people at the heart of a challenge. Design Thinking is an activity-based, iterative and continuous process with a strong emphasis on learning-by-doing, empathy and co-creation. In Design Thinking various disciplines are connected, from research and strategy to design and policy.

--- Monodukuri.com (Osamu Kumashaka) ---

Roles: (e7) Networking/Matching organizations

This is a nice portal site which has produced and implemented a mechanism for connecting (a) Issues in monodukuri (or manufacturing in general) and the industries having them with (b) Methods useful for solving the issues (and the professionals in such methods). The basis of this mechanism is the ‘Monodukuri Engineering Matrix’ which Osamu Kumashaka built during his R&D work for Pioneer Corp. The Matrix has rows of 60 Issues for monodukuri (i.e., Planning 7, Development & design 15, Manufacturing 22, and Quality in market 6) and columns of 118 Methods for solutions (including Strategy techniques 9, TRIZ 8, USIT 1, Quality engineering 8, etc.). In the Matrix cells, applicability and usefulness of the method for the issue is shown with the 4-grade evaluation (i.e., 3, 2, 1, and 0).

Kumashaka started this Monodukuri.com site in 2012 after his retirement. First he obtained supports and registrations by many professionals (currently 138), and obtained their contributions of introductory articles on individual methods and their usage (currently...
1600 articles, 2-3 pages each), training texts (currently 490 documents), and application case studies (currently 950 cases), for publicly
posting in the site. Users (in industries) may choose an issue most relevant to his/her problem from the list of 60 Issues, then is led by the
Matrix to possibly applicable/useful methods, and can further study the methods closely by reading their introductions and case studies. If
a user asks a question (or raise his/her own issue) openly at the site, any professionals may reply to it openly at the site as well.
All these basic use of the site is free of charge for the users (some of them need registration without charge), while there are additional
services of seminars and individual consultation with charge. The site is now operated with annual support money and payback for
consulting arrangement from the registered professionals. Professionals seem to find merits in the site for paying such money. Recently,
the site started a service by professionals to support SMEs for their applications to governmental grants.

Because of the accumulation of useful information and appropriate operation mechanism, this portal site is now growing steadily year after
year. This is certainly a significant business model started by Osamu Kumasaka.

Roles: (f1) Journals

About: MIT Technology Review is first to report on important new technologies that will affect your organization, your career, your life. What We Do: Every day, we provide an intelligent, lucid, and authoritative filter for the overwhelming flood of information about technology. We do this with serious journalism, written in clear, simple language, by a knowledgeable editorial staff, governed by a policy of accuracy and independence. We do this in features, news analysis, business reports, photo essays, reviews, and interactive digital experiences that invite our readers to probe deeper, examine data, and get to know experts and their opinions to see, explore, and understand new technologies and their impact. We do this with beautifully designed platforms and publications online, in print, on mobile, and in person at live events around the world.

Who We Are: We're an innovative, digitally oriented global media company whose reach is rapidly expanding. The mission of MIT Technology Review is to bring about better-informed and more conscious decisions about technology through authoritative, influential, and trustworthy journalism. Founded at the Massachusetts Institute of Technology in 1899, MIT Technology Review derives its authority from the world's foremost technology institution and from our editors' deep technical knowledge, capacity to see technologies in their broadest context, and unequalled access to leading innovators and researchers. Accuracy and independence are our highest priorities: our coverage is independent of any influence, including our ownership by MIT.

**JP-19** □ J-STAGE (operated by Japan Science and Technology Agency (JST))  https://www.jstage.jst.go.jp/browse/char/ja (in Japanese)
Location: JP  Language: JP, en
Roles: (f3) Repository

J-STAGE is an electronic journal platform for science and technology information in Japan, developed and managed by the Japan Science and Technology Agency (JST), under MEXT.
It posts academic publications in Japan exhaustively, including over 2000 journals, conference proceedings, and reviews published by various academic societies and research organizations in Japan. Up-to-date issues and back numbers (back to the old initial issues for important journals) of journals are available. Users may be registered without charge, and can read and download abstract and the first page for any paper freely. Full text of individual papers may be, depending on the journal, either readable and downloadable freely, or accessible under individual authentication by the publishing society, or accessible after individual payment.
The Yahoo search inside the J-STAGE site with the keyword TRIZ gives 291 hits. It may be possible that some more TRIZ-related papers published in old days are newly restored here in coming years. We should watch this site as an important and reliable academic information source.
(From Wikipedia) Amazon.com, Inc., is an American multinational technology company based in Seattle, Washington, that focuses on e-commerce, cloud computing, digital streaming, and artificial intelligence. It is considered one of the Big Four technology companies along with Google, Apple, and Facebook. Amazon was founded by Jeff Bezos on July 5, 1994, in Bellevue, Washington. The company initially started as an online marketplace for books but later expanded to sell electronics, software, video games, apparel, furniture, food, toys, and jewelry. ...

Note (TN, Sept. 26, 2019): From the viewpoints of our WTSP Catalogs, we are particularly interested in buying/selling books. Amazon book site is particularly useful because of its exhaustive list of titles, search mechanism with topics and authors, possibility of browsing their contents together with readers' reviews, availability of books from any publishers around the world, quick and sure delivery, easy payment, and also possibility for authors to sell their books directly.

IAM Media
https://www.iam-media.com/
UK en
Roles: (g2) Technology news, (f2) Publishers, (b3) International conferences

--- Written by Toru Nakagawa, Sept. 21, 2019
About: IAM is universally acknowledged as the world’s leading IP business media platform. It was launched as a magazine in July 2003 to address the need for organisations to maximise the value of their intellectual property and other intangibles, and to examine the strategies they can put in place to do this. IAM now produces a wide range of publications, as well as a weekly email and daily blog.
IAM is unique because it treats intellectual property as a business asset and tool, rather than simply as a legal right. With this unequalled appeal to the boardroom, IAM has established itself as the only IP publication that many senior corporate executives read regularly. The insight and intelligence IAM provides is topical, timely and continually thought provoking for its subscription-based readership.
Editorial quality and integrity are paramount. The quality of the editorial is guaranteed by an in-house team, based in London, Hong Kong and Washington DC, with long-established journalistic track records in the specialist IP and business press, including on titles such as the Wall Street Journal and the Financial Times. A number of articles are also commissioned from leading figures in the IP business world. IAM also publishes a weekly email which has over 27,000 subscribers. It comprises a summary of popular content and jurisdiction-based international reports from leading law firms. The website hosts a fully searchable archive of all articles and supplements published.
IAM is widely acknowledged as the world’s pre-eminent IP business event and attracts high-level delegates from industry, finance and investment, the law, academia and government, as well as IP intermediaries and aggregators. ....

About: Wikipedia is a multilingual, web-based, free-content encyclopedia project supported by the Wikimedia Foundation and based on a model of openly editable content. ...
Wikipedia is written collaboratively by largely anonymous volunteers who write without pay. Anyone with Internet access can write and make changes to Wikipedia articles. ....
Since its creation on January 15, 2001, Wikipedia has grown rapidly into one of the largest reference websites, attracting 374 million unique visitors monthly as of September 2015. There are about 72,000 active contributors working on more than 48,000,000 articles in 302 languages. As of today, there are 5,957,320 articles in English.
Note (TN, Sept. 26, 2019): Many keywords/terms of our interest in TRIZ and related methodologies are explained in Wikipedia. Contents and quality of them seem to vary much depending on the items and on languages. Wikipedia is often used as handy and reliable references by many people especially on the topics out of one's specialty. Thus the quality of description of each item should be important for better introduction of the items for common people.

(From Wikipedia) YouTube is an American video-sharing website headquartered in San Bruno, California. Three former PayPal employees—Chad Hurley, Steve Chen, and Jawed Karim—created the service in February 2005. Google bought the site in November 2006 for US$1.65 billion; YouTube now operates as one of Google's subsidiaries.
YouTube allows users to upload, view, rate, share, add to playlists, report, comment on videos, and subscribe to other users. It offers a wide variety of user-generated and professional media videos. Available content includes video clips, TV show clips, music videos, short and documentary films, audio recordings, movie trailers, live streams, and other content such as video blogging, short original videos, and educational videos. Most content on YouTube is uploaded by individuals, but media corporations including CBS, the BBC, Vevo, and Hulu offer some of their material via YouTube as part of the YouTube partnership program. Unregistered users can only watch videos on the site, while registered users are permitted to upload an unlimited number of videos and add comments to videos.
Note (TN, Sept. 26, 2019): Many organizations in our field of TRIZ and related methodologies have uploaded their video introductions and documents in YouTube. You may often be led from their sites to YouTube, while you may find many other relevant videos in YouTube by using keyword searches.

Roles: (g3) Knowledge sharing

About: Welcome to LinkedIn SlideShare! 80 million professionals trust SlideShare to learn about any topic quickly from subject matter experts. Founded in 2006 with the goal of making knowledge sharing easy, SlideShare joined the LinkedIn family in 2012 and has since grown into a top destination for professional content. With over 18 million uploads in 40 content categories, it is today one of the top 100 most-visited websites in the world.

Why use SlideShare? Learn faster, smarter: Build your knowledge quickly from concise, well-presented content from top experts. Instead of scrolling through pages of text, you can flip through a SlideShare deck and absorb the same information in a fraction of the time. Explore the best of SlideShare with our featured content. Learn any topic: Get up to speed on any topic. You'll find content from experts in every imaginable field – from Google's Eric Schmidt to the White House – who have contributed to over 35 categories and 18 million uploads.

Share your insights and get noticed: Show what you know through a presentation, infographic, document or videos. Visual formats help you stand out and resonate more with your readers. When you upload to SlideShare, you reach an audience that's interested in your content – over 80% of SlideShare's 80 million visitors come through targeted search. This can help you build your reputation with the right audience and cultivate more professional opportunities.

TN2F-11  ○ GoodReads  https://www.routledge.com/  Location: USA  Language: en
Roles: (g4) Social networks, (g3) Knowledge sharing

About: Who We Are: Goodreads is the world's largest site for readers and book recommendations. Our mission is to help people find and share books they love. Goodreads launched in January 2007

Top page: Meet your next favorite book. -- Deciding what to read next? -- You're in the right place. Tell us what titles or genres you've enjoyed in the past, and we'll give you surprisingly insightful recommendations.

What are your friends reading? -- Chances are your friends are discussing their favorite (and least favorite) books on Goodreads.

A Message From Our Co-Founder: When I was in second grade, I discovered the Hardy Boys series. Ever since, I've loved to read — both for fun and to improve my mind. And I'm always looking for the next great book. One afternoon while I was scanning a friend's bookshelf for ideas, it struck me: when I want to know what books to read, I'd rather turn to a friend than any random person or bestseller list. So I decided to build a website — a place where I could see my friends' bookshelves and learn about what they thought of all their books. Elizabeth, my co-founder (and now my wife) wrote the site copy and I wrote the code. We started in my living room, motivated by the belief that there was a better way to discover and discuss good books, and that we could build it.

Goodreads is that site. It is a place where you can see what your friends are reading and vice versa. You can create "bookshelves" to organize what you've read (or want to read). You can comment on each other's reviews. You can find your next favorite book. And on this journey with your friends you can explore new territory, gather information, and expand your mind.

Knowledge is power, and power is best shared among readers. Otis Chandler Co-Founder

TN3C-03 ◎ LinkedIn  https://www.linkedin.com/  Location: USA  Language: en
Roles: (g4) Social networks

(From Wikipedia) LinkedIn is an American business and employment-oriented service that operates via websites and mobile apps. Founded on December 28, 2002, and launched on May 5, 2003, it is mainly used for professional networking, including employers posting jobs and job seekers posting their CVs. As of 2015, most of the company's revenue came from selling access to information about its members to recruiters and sales professionals. Since December 2016 it has been a wholly owned subsidiary of Microsoft. As of June 2019, LinkedIn had 630 million registered members in 200 countries. LinkedIn allows members (both workers and employers) to create profiles and "connections" to each other in an online social network which may represent real-world professional relationships. Members can invite anyone (whether an existing member or not) to become a connection. LinkedIn participated in the EU's International Safe Harbor Privacy Principles.

Odyssey of the Mind (a Creative Competitions Inc. program)  
https://www.odysseofthemind.com/  
Location: USA  
Language: en

**Roles:** (h3) Educational organizations

Home: Odyssey of the Mind is an international creative problem-solving program that engages students in their learning by allowing their knowledge and ideas to come to life in an exciting, productive environment. Participants build self-confidence, develop life skills, create new friendships, and are able to recognize and explore their true potential. OotM proves that students can have fun while they learn.

Odyssey problems have challenged students to design mechanical dinosaurs, invent new factory machinery, build working vehicles, write a new chapter to Moby Dick, put a twist on classic artworks, turn Pandora's Box into a video game, and so much more.

Since 1978, OotM problems have challenged students to go beyond conventional thinking and incorporate creative problem solving in learning. Every year, competition in the global scale is held. World Final Competitions.

TN3C-17 ○ Steve Blank  https://steveblank.com/ Location: USA  Language: en
Roles: (i3) Personal Website

About Steve: Refer to his own introduction at https://steveblank.com/about/ (TN. It's amazing, and too long to quote here.)

From Wikipedia: Steve Blank (born 1953) is a Silicon Valley entrepreneur based in Pescadero, California. Blank is recognized for developing the customer development method that launched the lean startup movement, a methodology which recognized that startups are not smaller versions of large companies, but require their own set of processes and tools to be successful. His Lean Launchpad class (taught as the National Science Foundation Innovation Corps) has become the standard for commercialization for all federal research.

Blank writes and teaches about customer development and the lean startup method. He is an adjunct professor of entrepreneurship at Stanford; lectures at the UC Berkeley Haas School of Business, and is a senior fellow at Columbia University. He has written four books: The Four Steps to the Epiphany, Not All Those Who Wander Are Lost, The Startup Owner's Manual and Holding a Cat by the Tail.

--- Written by Toru Nakagawa, Sept. 21, 2019

Roles: (e2) Software/tool developers

Akihiro Katahira started to build this site in 2013 and has been developing it further till present. He understands that the act of Thinking is the repetition of two phases, i.e., 'Thinking out' (to get an idea useful for himself/herself) and 'Evaluation and decision'. Then in this Web site Katahira is trying to figure out 'What should we do to Think out better and more effectively?'.

He posts many interesting working papers on 'How to Think out' according to his own thoughts and in his own terms. Recently he developed and published a software tool of 'Fuda-Yose method', which allows to handle many labels (on which any keywords, short sentences, or figures are written) to move them around in various arrangements on the Excel window for stimulating users to think out. The Fuda-Yose Tool is also introduced in "TRIZ Home Page in Japan" together with a number of application examples.
